Compatible: Products considered physically compatible with Rustler in a two-way mix.

Conditional Compatibilities: Tank mixes of Rustler with the following product may result in nozzle or filter blockage if vigorous agitation in the spray unit is not maintained during the entire spray operation.

Not Recommended: Tank mixes of Rustler with the following product is likely to form a slimy residue which can block spray nozzles and filters during application.

Physical compatibility with Rustler should be determined prior to mixing with a product not listed above, or when mixing Rustler as a component of a 3-way tank mix.

Always read the product label for the manufacturer's tank mix recommendations and to determine individual product compatibility options and correct mixing orders for individual products. If unsure, perform a jar test before proceeding to determine physical compatibility. Physical compatibility does not always guarantee biological compatibility.
