

Purpose built for Horticulture

Spotlight Plus[®] was specifically formulated for horticulture with a built-in oil to give the following benefits:

- Increased efficacy of weed control, sucker control and haulm desiccation
- Reduces fine droplets that minimises drift. Grapevines are very sensitive to carfentrazone and spotting of canopy can easily occur - hence the desuckering registration.
- No need to add any further oil or surfactants including LI700[®]

Hammer [®]	Spotlight Plus
